DETAILED ACTION

1. This office action is in response to Applicants' paper filed 01 March 2004. The Examiner took Applicants' arguments under advisement and has withdrawn the previous restriction requirement. The new restriction requirement is as follows:

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 59-66, drawn to a peptide of claimed Formula I, pharmaceutical compositions thereof, and a method of using in the treatment of cancer in mammals.

Group II, claim(s) 67-68, drawn to methods for selecting a peptide antagonist.

1. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, there is no nexus between the two groups regarding the protein product of Group I. Group II does not require the protein product of Group I in any one of the method steps of Group II. Although the protein product of Group I was used at some point prior to the method steps of Group II, it is not a required component of the method steps of Group II. Thus, Group I-II lack a single general inventive concept and are patentably distinct.

2. If Applicants elect any of Group I, Applicants are further required to elect a specific species from which all claims in the elected Group shall be searched.
